Our Team of People

The Power of Multiple Brains

Atmost commitment to work and the quest for acquiring knowledge, to move in tandem with the ever changing business atmosphere, our team of people are passionate in learning new skills, methodologies, small improvements in all the aspects of day to day activities. The ultimate aim of all of us in our organization is not achieving mere customer satisfaction but exceeding the customer's expectation at all the times.

"If everyone is moving forward together, the success takes care of itself"

- Henry Ford

*"Great things in business are never done by one person.
They are done by a team of people"*

- Steve Jobs

WHILE CHOOSING A SUPPLIER FOR GRANITE MEMORIALS WHY IT IS IMPORTANT TO CHOOSE SIVA GRANITE PRODUCTS?

Quality reliability on-time delivery and post sale service are the four important criteria that you are looking for. That is why your choice should be obviously Siva Granite Products where all the four expectations of our customers are relentlessly practiced. Choosing the right granite from the quarry source, processing the granites to a high degree of perfection with hi-tech machinery and getting the granites pass through knowledgeable, committed people to check quality with their exotic skills in order to reflect the expectations of our buyers and to create value for every stone that is processed. All these are done only with the in-house capabilities from our manufacturing unit as many suppliers do not possess an all under one roof manufacturing facility.

"The purpose of business is to create and keep a customer"

- Peter F. Drucker

SELLING PEACE OF MIND NOT THE GRANITE ALONE

We in Siva Granite Products improve, challenge and constantly increase our knowledge as we believe, it vanishes otherwise. We know the problems in stones will make your time unworthy, and as we practice zero tolerance policy, our focus is all about giving at most worry free stones which is generally not present with most of the suppliers. Being a natural stone during the process we are put into enormous calamities of uncertainties with respect to color, grains, texture, patterns, etc. With our specialized knowledge in dealing with the above we are committed to give our customers only the best part of it and absorb all the nature's facets by ourselves and our customers can focus their time in selling.

"Curiosity is the key to Creativity"

- Akio Morita

We receive drawings in dxf format produce the stones in the exact dimensions as per our customers specifications as our design and drafting facilities are equipped to read draw drawings using CAD . These CAD drawings are straight away sent to our machines inorder to achieve high precision and less rectifications, reworks during the manufacturing process. The machinery tools that are deployed are of state of the art technologies to keep in track with the fast changing world. Since we are using a **CNC machine** to make profiles any complicated profile can be achieved in a speedy manner with due perfection. We are proud to say that we are the only monument company in India to own the CNC machine and have the capability to execute the CAD and dxf drawings sent by our buyers which is directly fed in to the machine, as the result we get the precise output. By deploying just half the work force of our competitors we deliver the orders in just half of the time what our competitors take to deliver.

Doing Great Things for Good People

PRE SALE AND POST SALE SERVICES OFFERED BY US

In memorials trade every now and then new designs are evolved. We give our customers quotes details of availability etc in shortest possible time which will enable them to secure the orders without wasting much time. Also we interact with customers regarding the weight details and other back office works related to our supply such as pricing, quantities, drawings for approval, samples, finalizing the layout of the quantities in a container, shipping, etc. Regarding the post sale service we ensure the container is cleared reaches the destination of our customers without any delay or trouble and post the details of delivery schedules etc at frequent intervals. This will enable our customer to commit on the delivery schedule with their customers.

All the above works are done at very fast pace without keeping the customers in wait. We also undertake door move delivery in order to save ocean freight and time in organizing the trucker, etc.

PRODUCTION AND QUALITY

We offer wide range of products irrespective of their sizes subject to a maximum length of 12-0 and width of 7-0. We have wire sawing facility to product up to these sizes of any thickness as our unit is equipped with apt handling facilities. The polishing is done in most of the manufacturing units in India using manual hand held machines but in our unit the polishing is done with PLC controlled automatic surface leveling and polishing machines which ensures the stones are of uniform thickness and polishing is achieved to a high levels of uniformity. **"The life of the granite is achieved only by proper polishing techniques, if not done properly the some will look good only at the time of supply and in course of time the granite will not stand the test of nature."** This is an important phenomena of producing granites which is learned by few people in the industry. In the previous 20 years we have produced most complicated sizes, designs and our expertise in carrying out the most difficult orders and shapes are not possessed by much of our competitors.

MINUTE DETAILS ADHERED

Attention to small details is the way of life in our unit and we leave no stone unturned when it matters paying attention to minute details not only in stones but with regard to maintenance of our machines, cleanliness, housekeeping and safety of our workers. All these reflect in to the end product of our supply that is our **"customers atmost satisfaction"** fair enough to call it as addiction towards us which we want to preserve for a long time. **Exceeding customer expectation is our goal and not mere customer satisfaction** which is achieved by practicing excellence and by carrying out small, tiny improvements in all spheres of our production.

Carving and designs are done with professional hand carvers who have emerged from the traditional carving families present in India since time immemorial. The shapes of the hand carved three dimensional designs are religiously learnt and practiced which are the unique capabilities acquired by us. Using high technology hand tools to dig out the features in carving and simulating with the real picture in computers our carving commands great appreciation from our buyers.

Awaiting to Hear from you

Place your enquiries and orders @ sivaorders@gmail.com as we are waiting to have you as one of our most valuable customer. Please visit us at www.sivagranites.co.in.
